

Panel 5: Coherence Ratios & Final Metrics

Step 13: Coherence Ratios

Exploitation Coherence:
 $= \mu_{\text{exploit_intra}} / \mu_{\text{inter}}$
 $= 0.82 / 0.65 = 1.26$

Steps 15-17: Additional Metrics

Exploration Coherence:
 $= \mu_{\text{explore_intra}} / \mu_{\text{inter}}$
 $= 0.38 / 0.65 = 0.58$

Exploitation %: 60%
Exploration %: 40%
Number of switches: 4
Avg exploit size: 2.0
Avg explore size: 1.0

Step 14: Phase Separation Index (PSI)

$$\text{PSI} = (\mu_{\text{exploit_intra}} + \mu_{\text{explore_intra}}) / 2 - \mu_{\text{inter}}$$

$$= (0.82 + 0.38) / 2 - 0.65$$
$$= 0.60 - 0.65 = -0.05$$

(Negative = phases less distinct)

Step 18: Final Results

Clustering:
Coefficient: 0.75
Num clusters: 3

Frequency:
Mean rank: 1250
Median rank: 980
